ABOUT US

Where We Began

It all started as an idea when we realized that there was a big gap in the market for boutique consulting services and value addition of sharing the right knowledge base and tools that have been executed, scaled, and evolved in markets like India. With over 20 years of experience in eCommerce and scaling businesses, we knew that we had the knowledge and expertise to help these startups succeed. We observed that many new companies struggled to navigate the complex business landscape, and we wanted to be there to offer guidance and support. By sharing our experience and knowledge, we could help startups avoid common pitfalls and achieve their goals.

Our Company Today

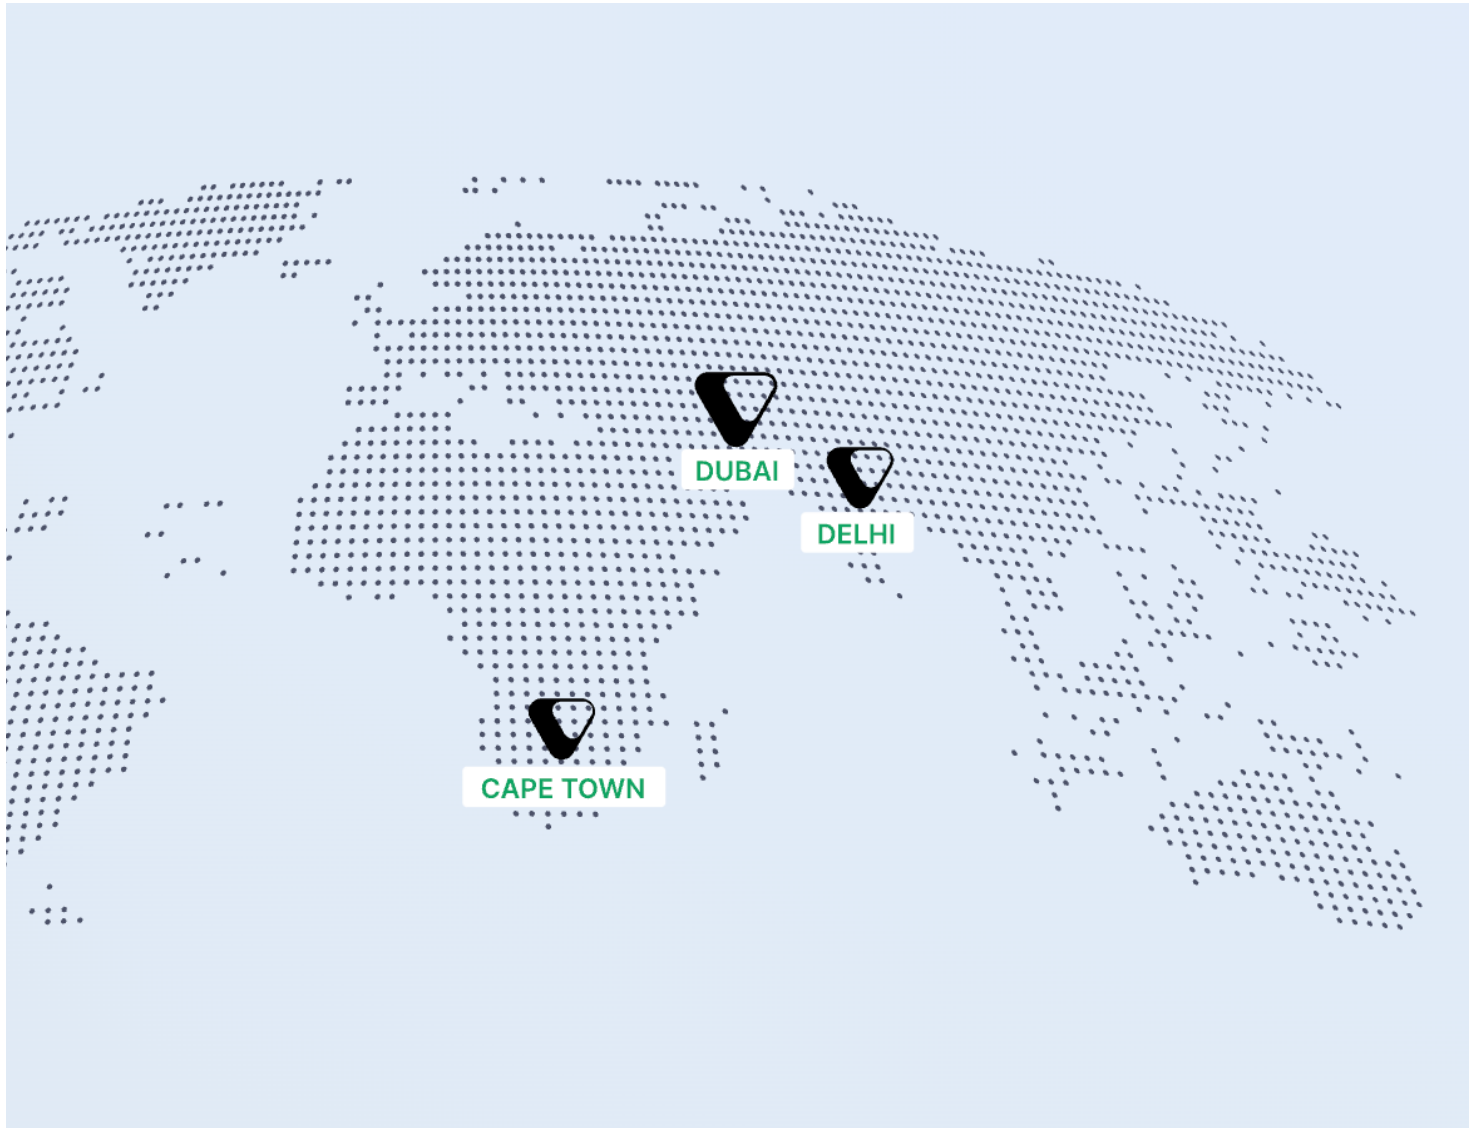

Today, we are proud to say that we have come a long way from where we started. Our focus on helping startups and companies looking to evolve has led us to partner with some of the biggest names in the industry. These partnerships have enabled us to offer even more value to our customers and create wider use cases that can be replicated with a set framework and localized based on the environment and digital readiness of the country. We have offices in key locations in **India, Dubai, and Cape Town, South Africa.**

This journey helped us evolve and start three verticals;

- a) IT development services
- b) Managed Teams / Staff Augmentation
- c) Building and Scaling Startups

OUR PRESENCE

We help companies; launch and scale their digital business across Africa, the Middle east and India.

DPI READINESS & CONCEPT NOTES

Background: The DPI Decade Digital Public Infrastructure (DPI) represents the next leap in how societies deliver inclusion and innovation. Across Africa and South Asia, governments are building identity, payment, and data exchange systems modeled on India’s DPI stack (Aadhaar, UPI, ONDC). The Venture Studio Technologies Pty Ltd (“The Venture Studio”) will collaborate with governments and partners to turn the DPI frameworks into scalable, citizen-centric applications improving access and trust.

Our Readiness: Proven Capabilities

Capability Area	DPI Relevance
ESG & Data Infrastructure	Experience in data platforms aligns with DPI data exchange frameworks.
Healthcare Digitization	Patient identity & consent frameworks mirror national ID & data sharing layers.
Payments & POS Technology	Webbie Shop POS integrates multi-gateway payments and offline sync interoperability.
API & Cloud Engineering	Deep experience in API orchestration, SaaS, and cloud deployments ensures scalability.
Cross Regional Delivery (India ↔ Africa)	Adapts India’s DPI lessons to Africa’s local infrastructure realities.

DPI READINESS & CONCEPT NOTES

Strategic Pillars of DPI Readiness

Interoperability by Design	Open APIs, standardized schemas, and modular components
Inclusion through Access	Multilingual and accessible systems ensuring equitable participation.
Security, Privacy & Governance	Consent-based data access, encryption, and transparent policies.
Sustainability & ESG Integration	Embedding ESG metrics and inclusion tracking in every DPI project, if needed.

Collaboration Framework

Objective:

- 1. Co-develop and localize DPI** components and citizen-facing services with governments and partners.
- 2. Key Partners:**
 - i) Google Cloud Public Sector – Infrastructure, sandbox environments, and AI/ML enablement.
 - ii) Co-Develop Fund and World Bank – Framework alignment, inclusion principles, and catalytic funding.
 - iii) Ministries & ICT Authorities – Policy direction and DPI program ownership.
- 3. Engagement Model:**
 - i) Co-Design – Identify priorities (i.e, Smart ID, Agriculture, Payment Rails, Health, SME, ESG, Education).
 - ii) Prototype – Build MVPs in Google Cloud sandboxes.
 - iii) Validate – Pilot with ministries and innovation hubs.
 - iv) Scale – Transition pilots into national DPI frameworks.

Let's Build DPI for Good

This decade will define how billions of people access services, opportunities, and trust online.

Let's make sure Africa and South Asia lead the way – responsibly, inclusively, and openly.

LET'S COLLABORATE
